Typha latifolia

Twitter: @herbologyhunt

Very tall – 1.5 to 3 m high, with a

distinctive large brown sausage -

shaped flowerhead made up of

shaped flower-head sausage

lots of tiny male and female

flowers. Leaves are long and

strap-shaped Plants grow in

clumps. Found in wet places

such as river edges, ditches and

marshes. The plants can clean

the water by absorbing some

types of pollution. Dried leaves

were used to make chairs seats

by weaving them together.

Hedge woundwort

Stachys sylvatica This has a lovely spire of reddish-purple flowers that have white spots on them. The leaves are heart-shaped, toothed and hairy. The plant has an unpleasant smell described as "foetid". Found along hedges and in shady places. The leaves of the plant were used in olden days to stop wounds bleeding.

#herbologyhunt hashtag.

Figwort

Scrophularia nodosa This plant has small flowers with a purple top lip and white parts beneath. Bees love them! The leaves are pointed and smooth. The stem is square, but if there are big "wings" on the corners you may have found Water figwort. This plant is also "foetid". Found in woods and other shady places. It was once used to treat a disease called scrofula.

My age:

Ragwort.

Go to

Jacobaea vulgaris This is a tall growing plant with bright yellow daisy-like flowers. The flowers are grouped together. The leaves have deep wavy edges, (lobed), and grow alternately up the stem. It is found growing on rough ground and in grassy places. The plant is poisonous to horses when dried and in a hay bale. Animals tend to avoid eating the living plant. Ragwort is an important source of food for many insects.

If you're really good at finding

flowers, you can join the Wild Flower Society. You will get a diary where you can record

all of your plant finds, earning

badges for the number of plants you can spot in a year.

Great plantain

Plantago major

The leaves grow flat to the ground in well-trodden areas on grass and edges of paths. It has wide leaves with parallel veins. If the leaves are very hairy you may have found Hoary plantain. It has very small flowers grouped around a long green spike. In the USA it was called "white man's foot" as wherever the Europeans went, the plantain grew.
